- 9 Dr. Bloch was known as “the poor man’s doctor.” For 37 years in Linz, Austria, he treated patients who had little status or wealth. He charged only what his patients could afford to pay him, which often was nothing. In an article in *Colliers* published in 1941, Bloch said he wondered how the “gentle boy” he knew could become the Führer. Allowed by Hitler to emigrate to the United States, Bloch died in 1945 after asserting that he was “100 percent Jewish.” Before he died, he wondered: “What does a doctor think when he

 - 20 Although Peres did not win the election as expected—he was twice defeated by Menachem Begin for the office of prime minister—he eventually did hold the office twice. He opposed the Camp David Accords and the peace treaty they led to, but endorsed both in the following years. Peres shared, along with Israeli Prime Minister Yitzhak Rabin and Palestinian leader Yasser Arafat, the 1994 Nobel Peace Prize for his role in negotiating the Oslo Accords. According to the terms of this historic agreement, the Palestine Liberation Organization (PLO) acknowledged that Israel had a right to exist in peace and it renounced terrorism. In return, Israel recognized the PLO as the representative of the Palestinians.

SEVEN

- 1 According to the Associated Press Stylebook: "The style and spelling of names in North Korea and South Korea follow each government's standard policy for transliterations unless the subject has a personal preference. North Korean names are written as three separate words, each starting with a capital letter: Kim Jong Il. . . South Korean names are written as two names, with the given name hyphenated and a lowercase letter after the hyphen: Lee Myung-bak. . . In both Koreas, the family name comes first.

The audio version of Barkham's comments confirm the physician thought the dictator experienced *hypomania*. *Hypermania* is a more extreme version of mania compared to *hypomania*. Hypermanic symptoms are similar to hypomaniac symptoms but are present to a greater degree. Hypermania is more likely to involve paranoia and/or other signs of psychosis. It is possible for a severely ill individual to cycle between hypomania and hypermania.

Frost: “Would you say that there are certain situations—and the Huston Plan was one of them—where the president can decide that it’s in the best interests of the nation, and do something illegal?”

Nixon: “Well, when the president does it, that means it is not illegal.”

Frost: “By definition.”

Nixon: “Exactly, exactly. If the president, for example, approves something because of the national security, or in this case because of a threat to internal peace and order of significant magnitude, then the

president's decision in that instance is one that enables those who carry it out, to carry it out without violating a law. Otherwise they're in an impossible position."
